① Knowledge graph:

The knowledge graph is a knowledge base used by Google to enhance its search engine's search results with semantic-search information gathered from a wide variety of sources. It captures entities, attributes and relationships. Nodes are entities. Nodes are labeled with attributes

Schema knowledge graphs

In the schema knowledge graph the leaf node contains the data which can be further classified. It represents the schema of the data without representing the inner details of the text.

The schema knowledge graph for the text mentioned is represented below.

Data Knowledge graph

The data knowledge graph the data is represented by its innermost details. The complete representation of the data is shown in the leaf node.

2) a) What

ques: what is the reason for increase in fare rates?

Ans: High fuel prices
